1 Introduction

1.1 Purpose of the Manual

This User Instruction Manual provides step-by-step guidance on how to use the **CropTech Agricultural Management Platform**. It is intended to help users understand the system's features, navigate the interface, and properly perform common tasks.

The manual follows international standards for user documentation to ensure clarity, consistency, and ease of use for both technical and non-technical users.

1.2 System Overview

CropTech is a web-based agricultural management system designed to support rice farmers and agricultural managers by providing tools for:

- Field and land tracking
- Inventory management
- Agricultural data analytics
- Real-time and historical data visualization

The system integrates mapping services, weather data, and backend data processing to support data-driven agricultural decision-making.

2 Intended Users

This system is designed for the following user groups:

- Rice farmers
- Field workers
- Farm managers
- Agricultural staff

Note: Users are expected to have basic knowledge of using a web browser but do not need technical or programming skills.

3 System Requirements

3.1 Hardware Requirements

- Desktop or laptop computer
- Minimum screen resolution: 1280 × 720
- Stable internet connection

3.2 Software Requirements

- Web browser (Google Chrome, Mozilla Firefox, Microsoft Edge)
- Internet access for real-time data features such as weather updates and maps

4 Getting Started

4.1 Accessing the System

1. Open a supported web browser.
2. Enter the CropTech website URL in the address bar.
3. The Landing Page will appear.

On the Landing Page, you are presented with options to either **Sign In** or **Create Account**.

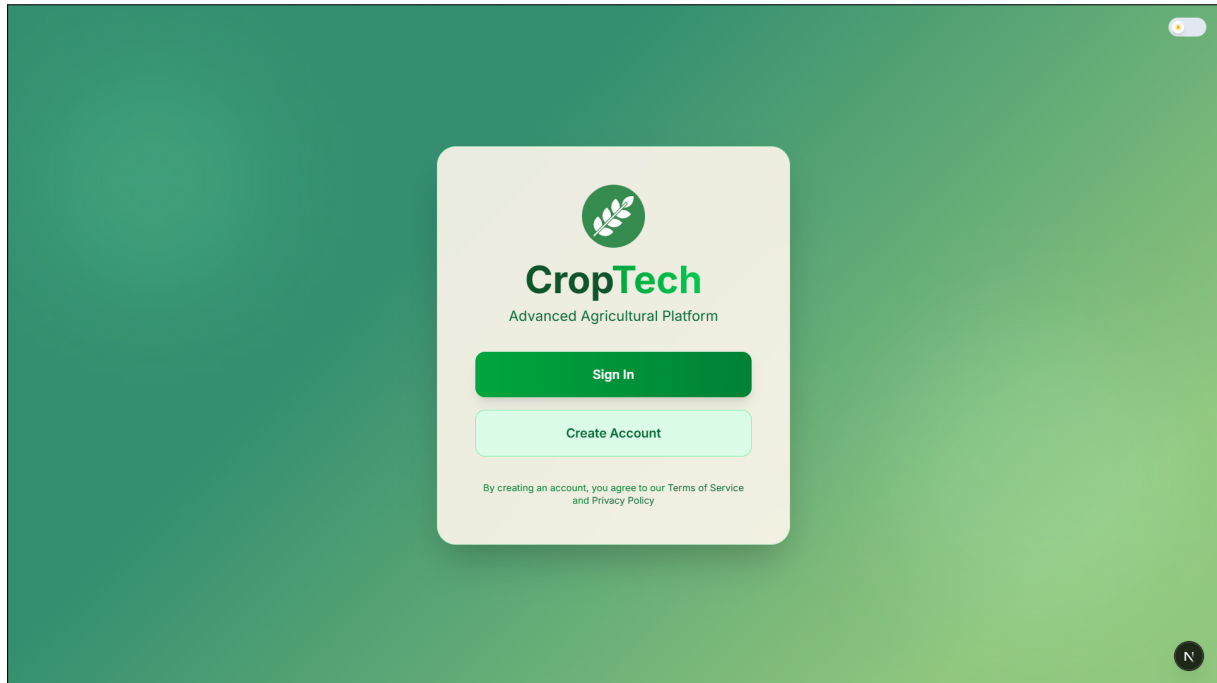

Figure 1: Landing Page with Sign In and Create Account buttons.

5 User Account Management

5.1 Logging In

If you already have an account:

1. Click **Log In** on the Landing Page.
2. Enter your registered **Email Address** and **Password**.
3. Click the **Log In** button to proceed to the Dashboard.

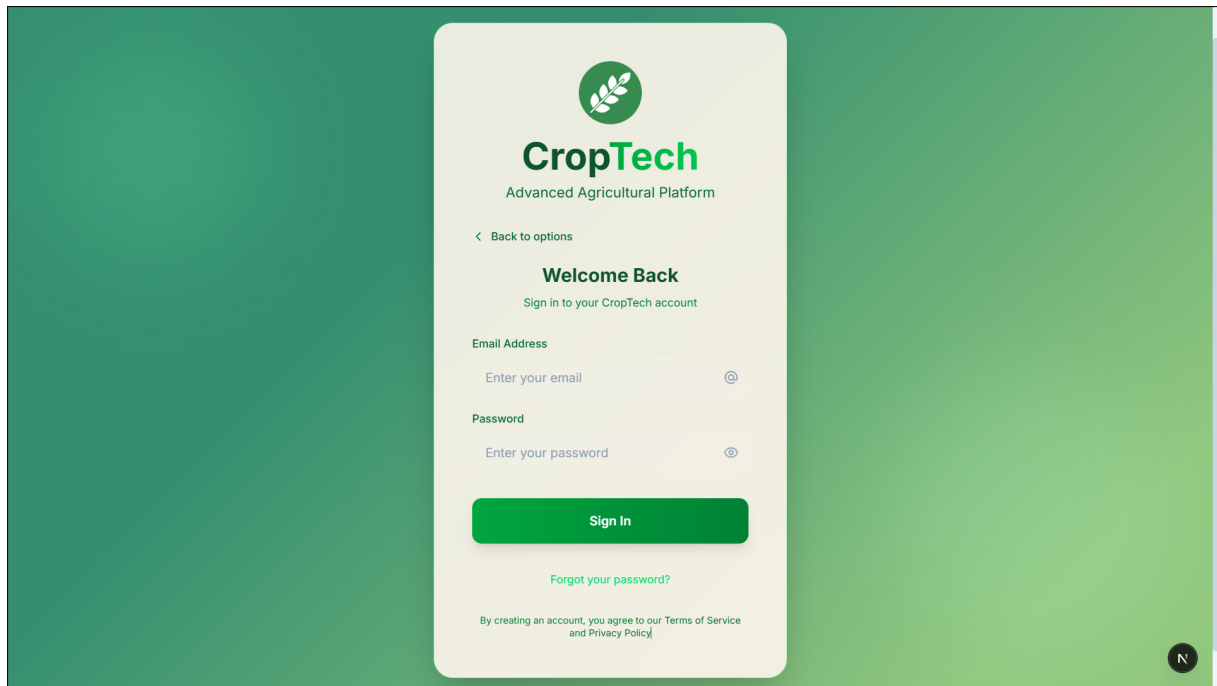

The image shows a mobile application screen for the CropTech platform. At the top, there is a green header with the CropTech logo (a green circle with a white leaf) and the text "CropTech Advanced Agricultural Platform". Below the header, there is a "Welcome Back" section with the text "Sign in to your CropTech account". There are two input fields: "Email Address" with a placeholder "Enter your email" and a green eye icon, and "Password" with a placeholder "Enter your password" and a green eye icon. Below the input fields is a green button labeled "Sign In". At the bottom, there is a link "Forgot your password?" and a small text "By creating an account, you agree to our Terms of Service and Privacy Policy". A small green circle with a white 'N' is in the bottom right corner.

Figure 2: Sign In inputs for Email Address and Password.

5.2 Creating a New Account

If you are a new user:

1. From the Landing Page, click **Create Account**.
2. Fill in the required fields: **Full Name**, **Email Address**, and **Password**.
3. Click **Sign Up**.

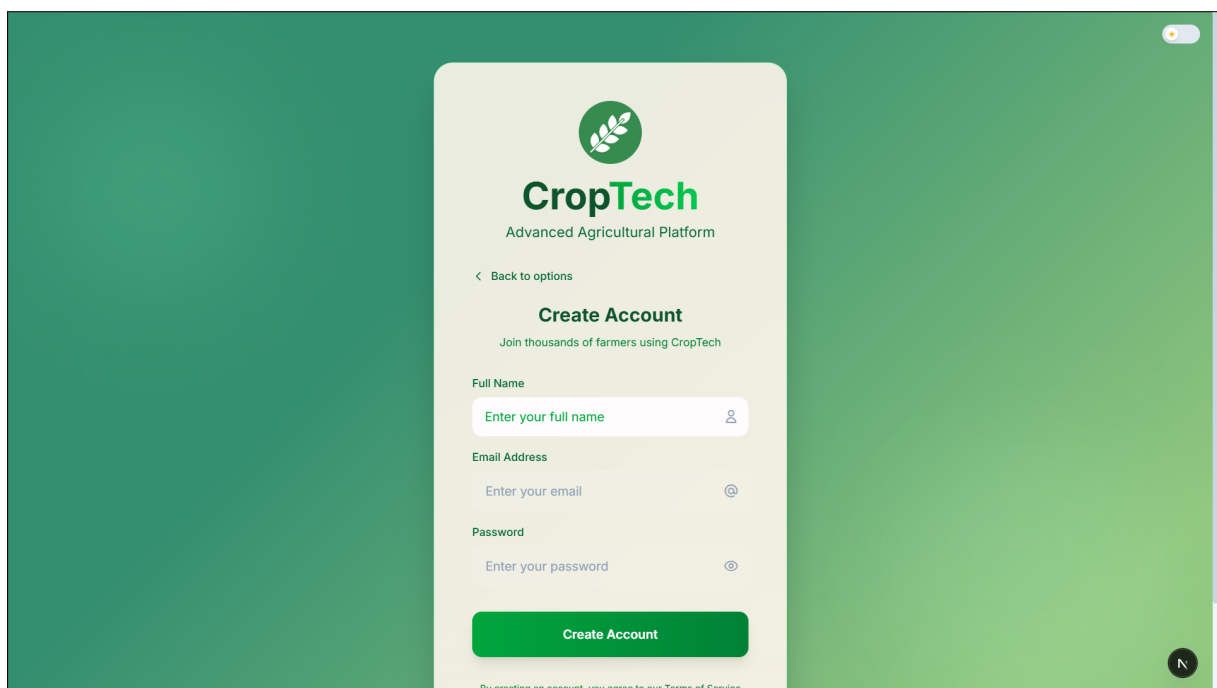

The image shows a mobile application screen for the CropTech platform. At the top, there is a green header with the CropTech logo (a green circle with a white leaf) and the text "CropTech Advanced Agricultural Platform". Below the header, there is a "Create Account" section with the text "Join thousands of farmers using CropTech". There are three input fields: "Full Name" with a placeholder "Enter your full name" and a green person icon, "Email Address" with a placeholder "Enter your email" and a green eye icon, and "Password" with a placeholder "Enter your password" and a green eye icon. Below the input fields is a green button labeled "Create Account". At the bottom, there is a small text "By creating an account, you agree to our Terms of Service". A small green circle with a white 'N' is in the bottom right corner.

Figure 3: Create Account inputs: Full Name, Email, Password.

6 Dashboard

The Dashboard is the central hub of the application.

6.1 Overview and Quick Actions

The dashboard displays an overview of:

- **Key Metrics:** Total Fields, Active Crops, Harvest Yield, and Revenue.
- **Quick Actions:** Buttons to "Manage Fields", "Check Inventory", and "View Analytics".
- **Recent Activity:** A log of recent events like new crops planted, inventory updates, or completed harvests.

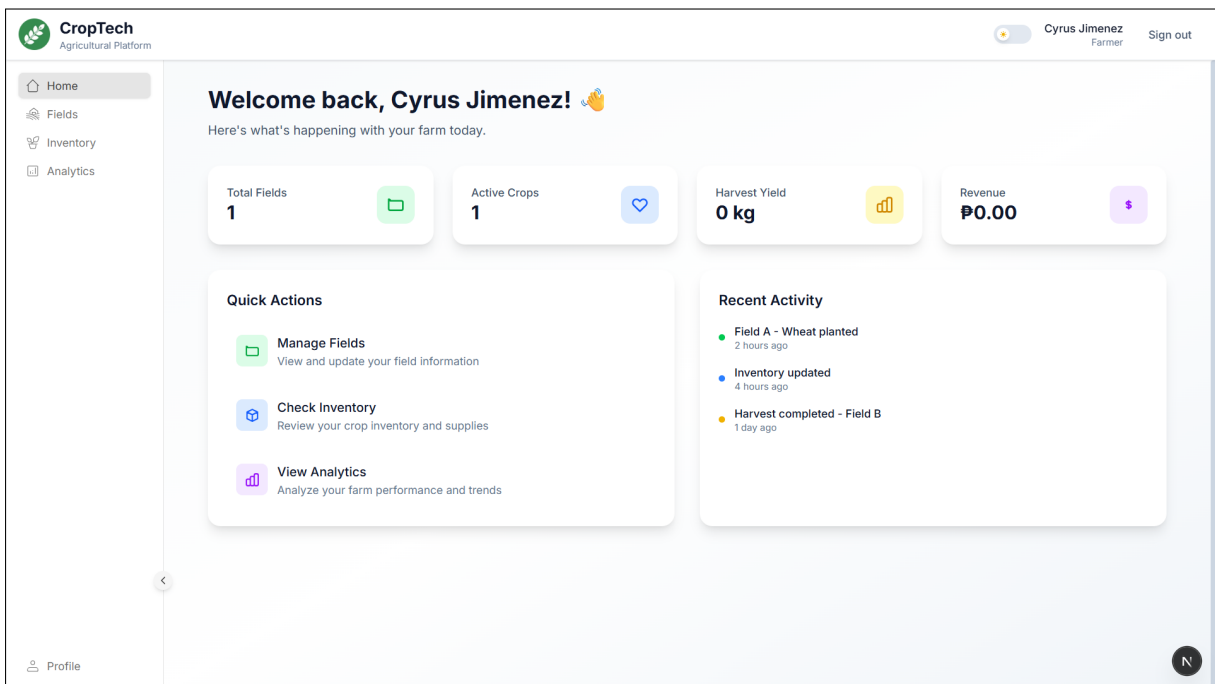

Figure 4: Overview of metrics, quick actions, and recent activity.

6.2 Navigation

The side navigation bar provides access to all modules. It can be collapsed to save space; hover over the icons to see tooltips indicating the page names.

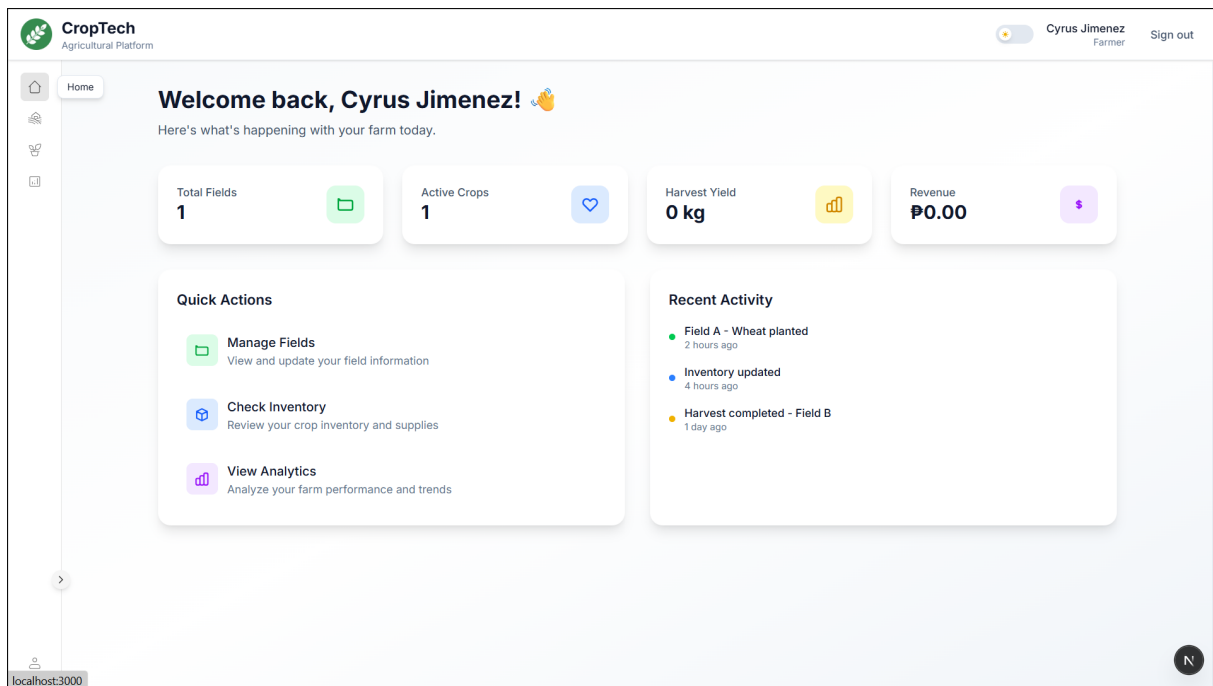

Figure 5: Collapsible side navigation bar with tooltips.

6.3 Theme Customization

You can customize the appearance of the application to suit your lighting conditions.

1. Locate the **Theme Toggle** switch in the top header bar of the application.
2. Click the toggle to switch the interface between **White Mode** (Light) and **Dark Mode**.

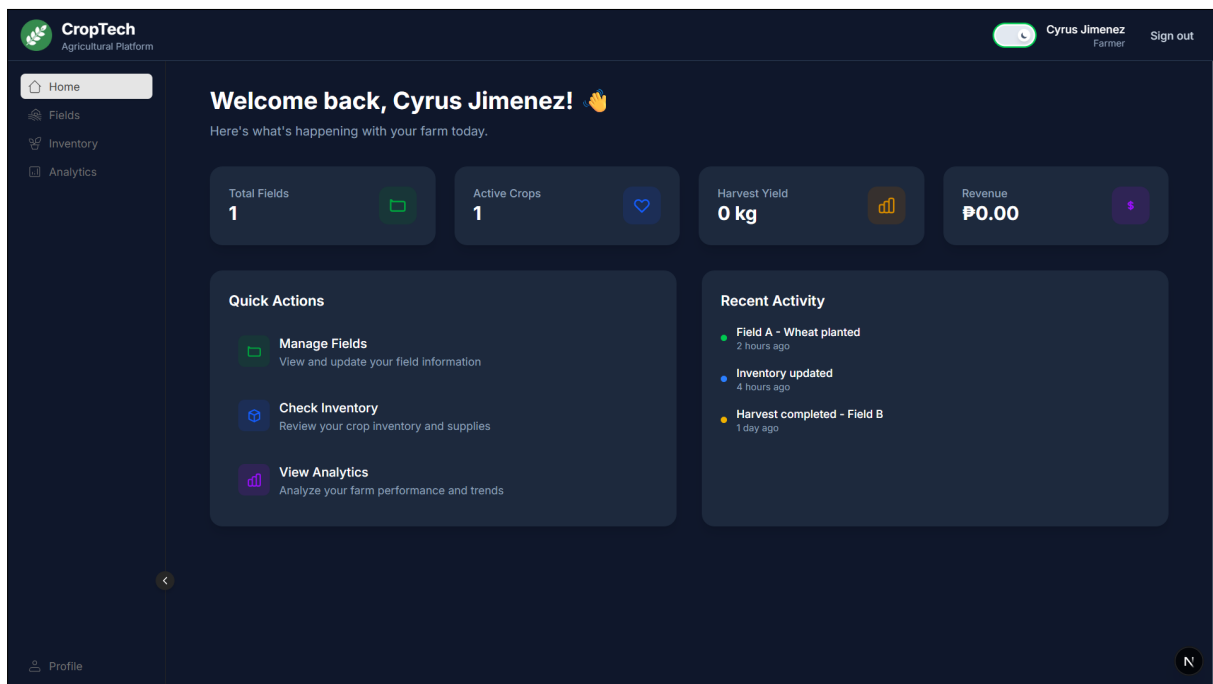

Figure 6: Header toggle switch for Light/Dark mode.

7 Fields Page (Land Tracker)

7.1 Map Interface

Navigate to the Fields page to manage your land.

- **Map:** Displays pins for all registered fields.
- **List:** Shows a sidebar list of crop fields added.

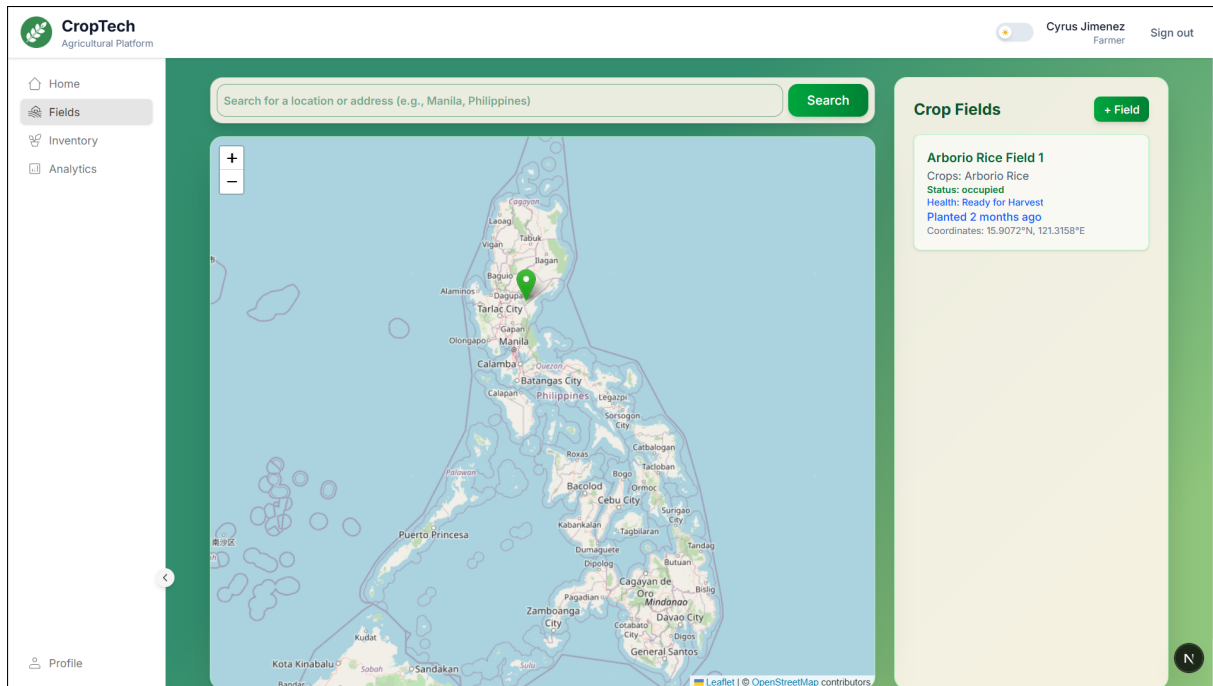

Figure 7: Map view with pins and list of crop fields.

To find a location, use the search bar. The map will update and zoom to the searched location.

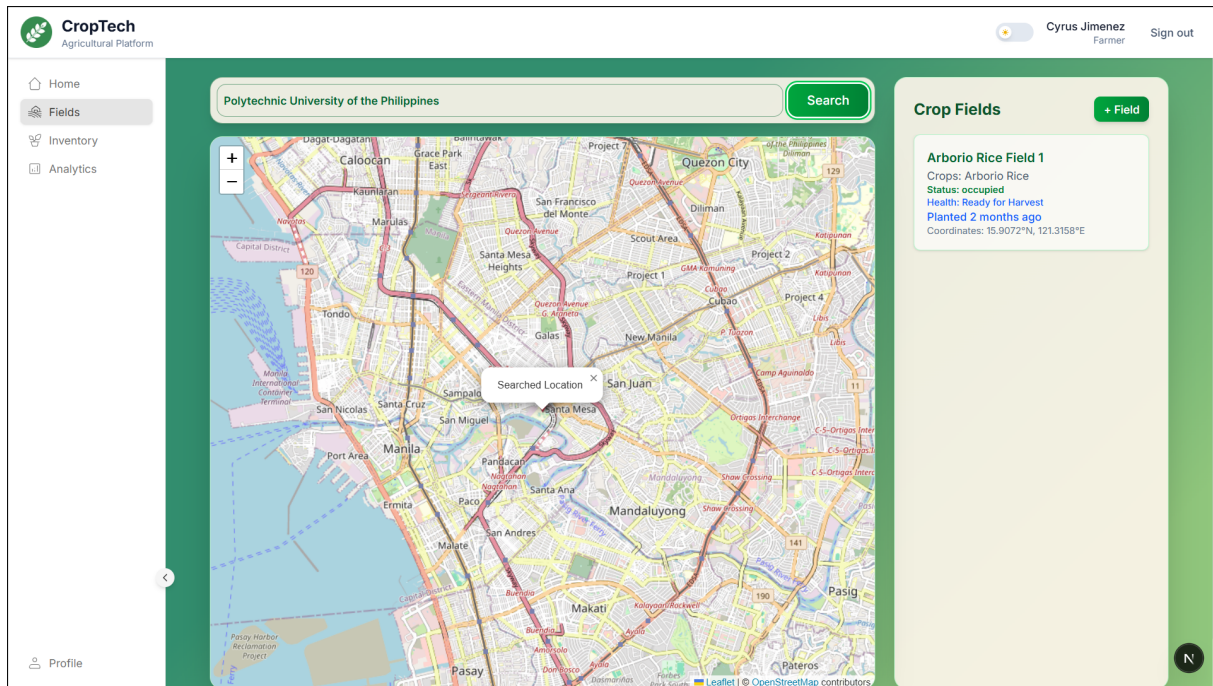

Figure 8: Map updating based on searched location.

7.2 Adding a Field

1. Click the **Add Field** button. 2. Follow the instruction "Click 4 points to add a field".

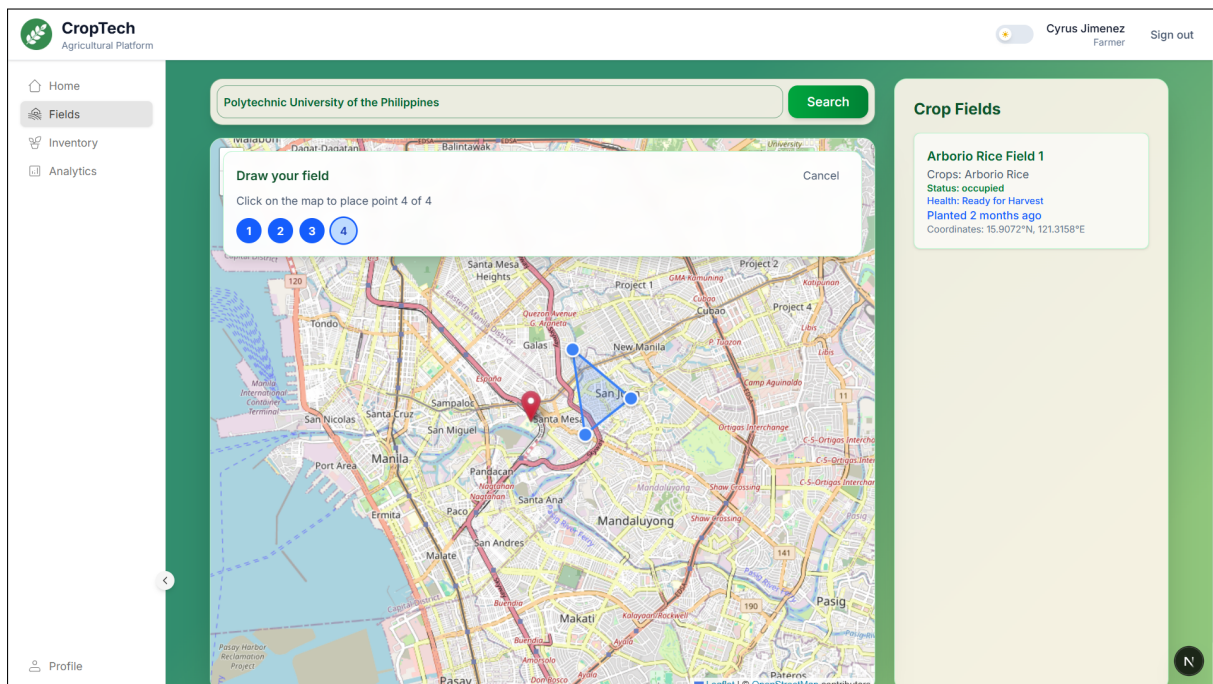

Figure 9: Map instruction to draw by clicking 4 points.

3. After clicking 4 points, verify the area. You can **Restart** drawing, **Exit Field** to cancel, or click **Next** to proceed.

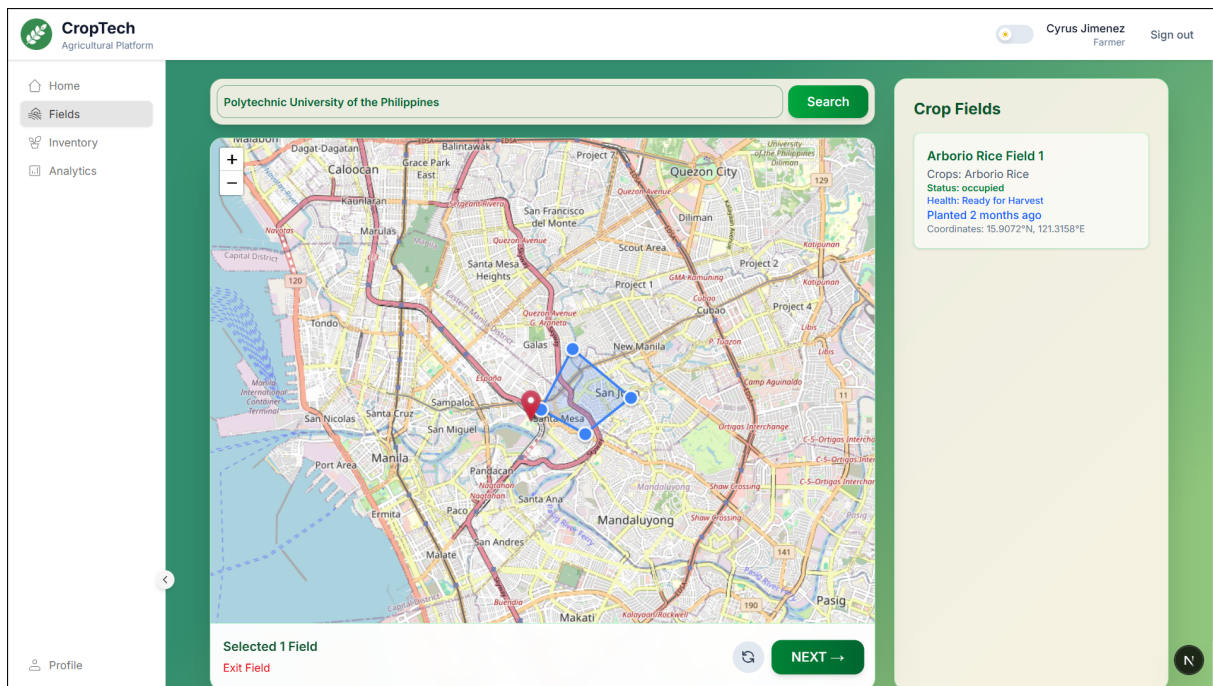

Figure 10: Field area defined with Restart, Next, and Exit buttons.

4. In the "Field Details" pop-up, enter:

- Field Name
- Crop (select from inventory or skip)
- Size (ha)
- Planting Date
- Expected Yield (kg)

5. Click **Save Field** to finish.

The screenshot shows the 'Field Details' modal form in the CropTech Agricultural Platform. The form is overlaid on a map of the Philippines. The form fields include: Field name (Field 2), Crop (from inventory, optional) (Skip (no crop yet)), Field size (ha) (e.g., 2.5), Planting date (21/01/2026), Expected yield (kg) (e.g., 5000), and Location (14.6032°N, 121.0222°E). The form has 'Cancel' and 'Save Field' buttons. The background shows a map of the Philippines with a search bar and a 'Crop Fields' list on the right.

Figure 11: Inputs for field name, crop, size, planting date, and yield.

7.3 Field Details & Monitoring

Select a field from the list to view detailed information.

- **Header:** Displays Field ID and Location (Field Name is editable).
- **Weather:** Shows real-time Temperature, Humidity, Precipitation, Cloud Cover, and Wind.

The screenshot shows the 'Arborio Rice Field 1' details page in the CropTech Agricultural Platform. The page displays the field name, ID, and location. It also shows real-time weather information: Mainly clear, 2026-01-21, Temp (°C) 19.8, Humidity 65%, Precip Prob 0%, Precip (mm) 0, Cloud Cover 23%, and Wind 48.2 kph. The 'Arborio Rice' section shows planting date (November 18, 2025), health (Ready for Harvest), age (Planted 2 months ago), and area (1.25 ha). The 'Planting & Harvest Calendar' section shows the planting date (18/11/2025) and expected harvest date (dd/mm/yyyy). The page has a sidebar with navigation links and a top bar with user information.

Figure 12: Location details and real-time weather information.

Scroll down to view:

- **Crop Info:** Crop planted, health, age, area, and notes.
- **Calendar:** Planting Date and Expected Harvest (editable).
- **Field Summary:** Area code and City.

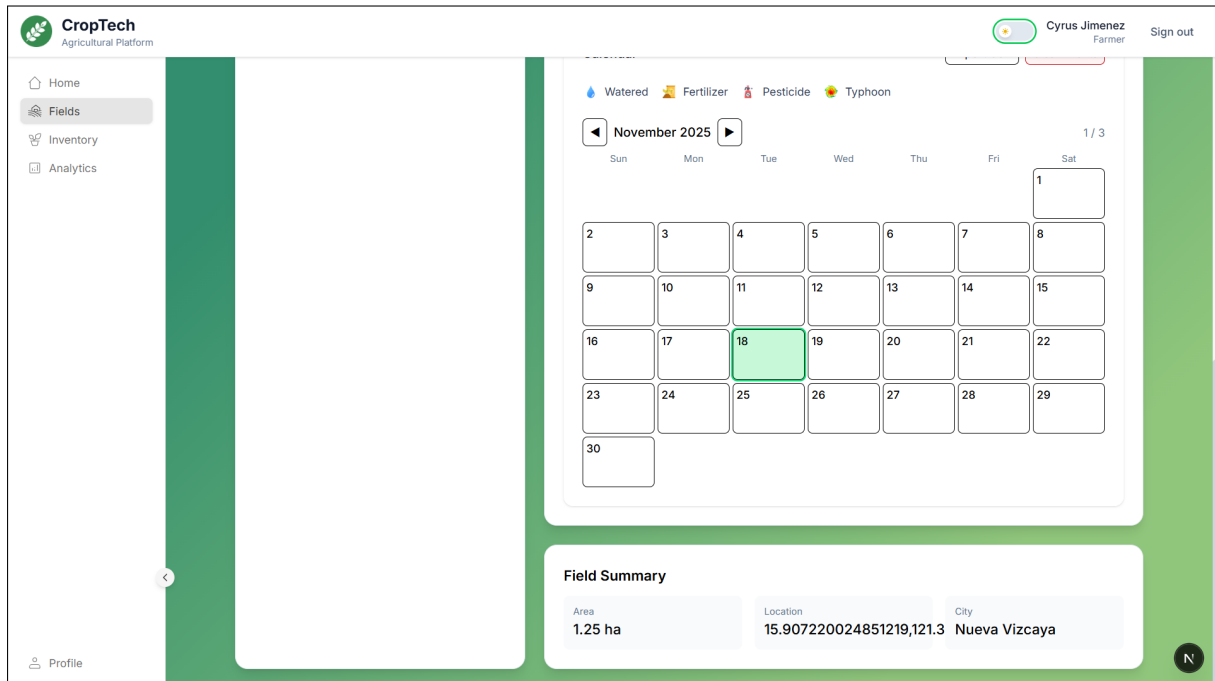

Figure 13: Crop health, age, planting calendar, and field summary.

7.4 Event Management

You can track farm events on the calendar. 1. Click a date on the calendar. 2. Select an event: **Watered**, **Fertilizer**, **Pesticide**, or **Typhoon**.

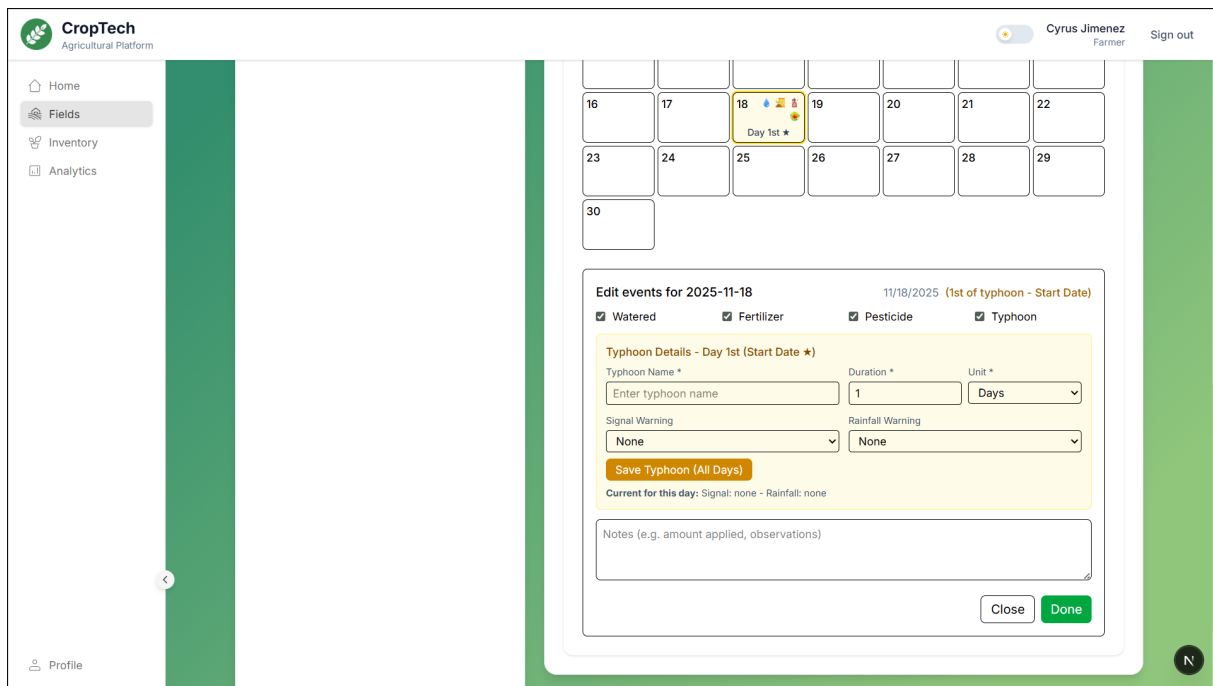

Figure 14: Menu to check Watered, Fertilizer, Pesticide, or Typhoon.

If **Typhoon** is selected, enter:

- Typhoon Name and Duration (Days/Weeks).
- Signal Warning (1-5) and Rainfall Warning (Yellow/Orange/Red).
- Click **Save Typhoon** to mark the calendar.

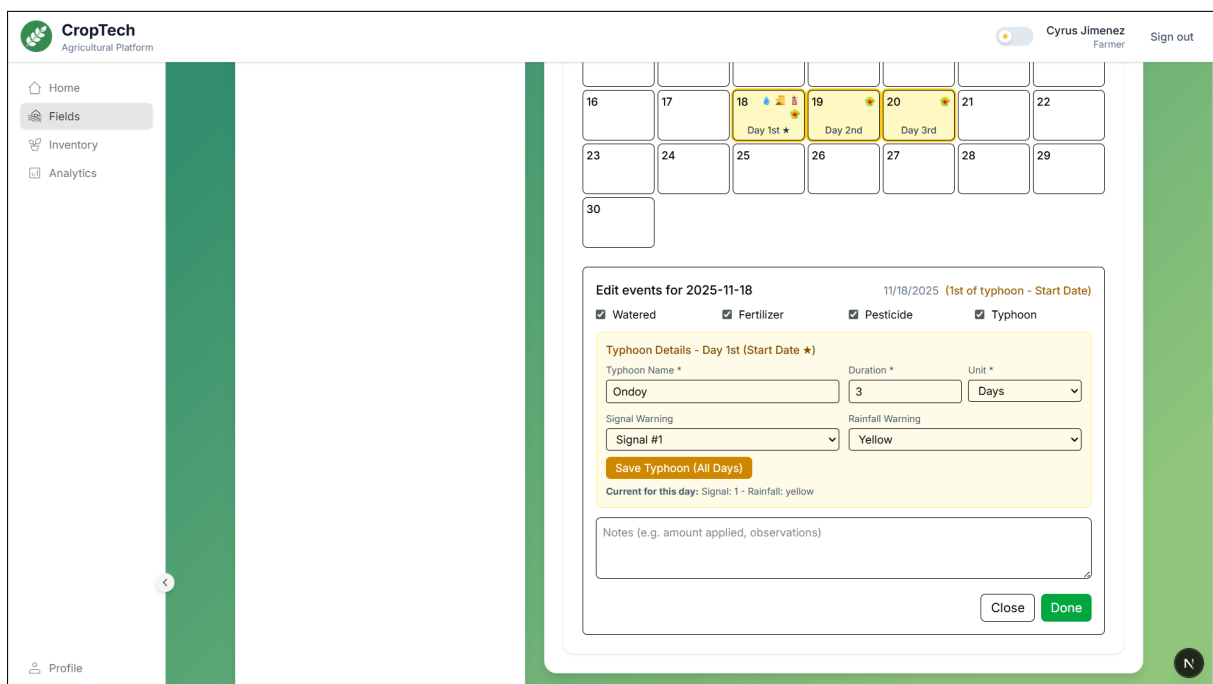

Figure 15: Typhoon details: Name, Duration, Signal, and Rainfall warning.

7.5 Harvest Tracking

The system calculates the estimated duration remaining for the crop.

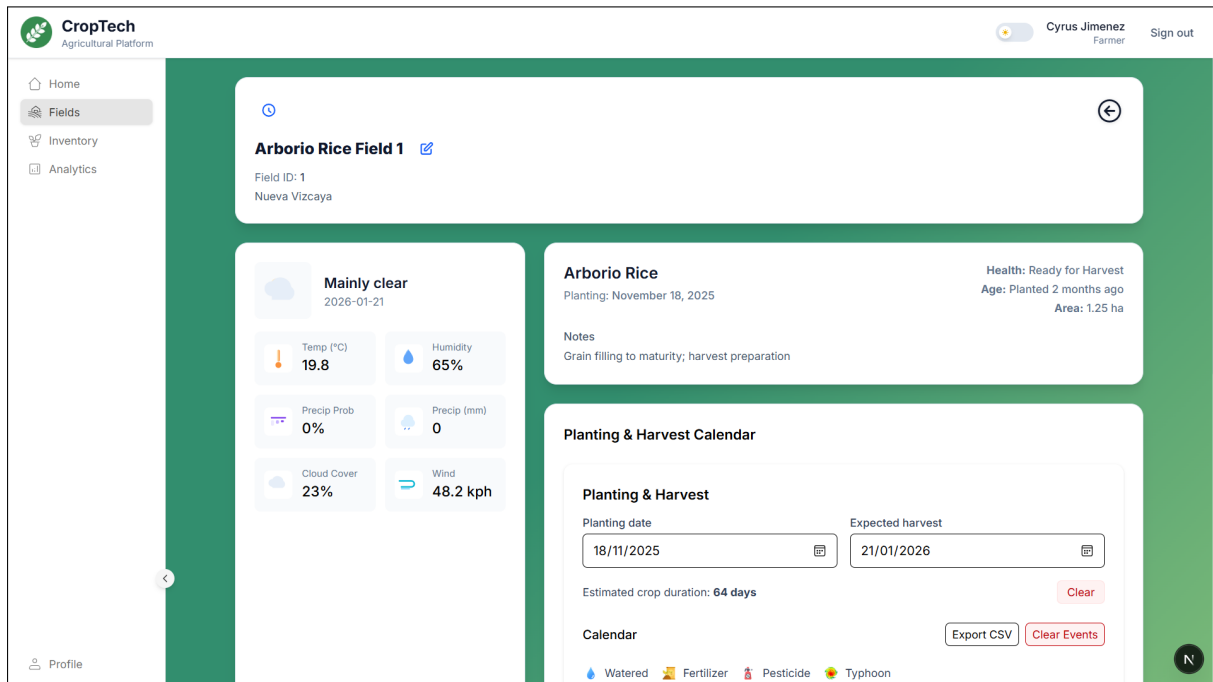

Figure 16: Estimated crop duration displayed in days.

The harvest button updates based on the date:

- **Harvest Early:** Appears if today is *before* the expected harvest date.
- **Harvest Now:** Appears if today is the expected harvest date.

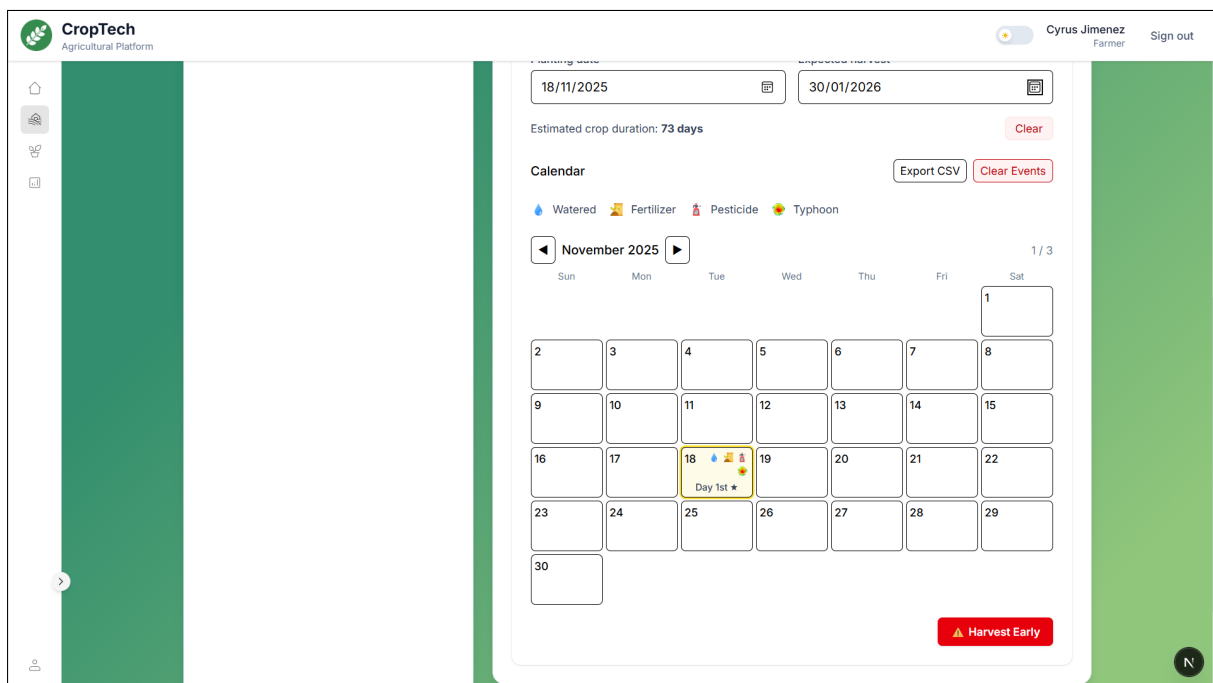

Figure 17: Button displayed before expected harvest date.

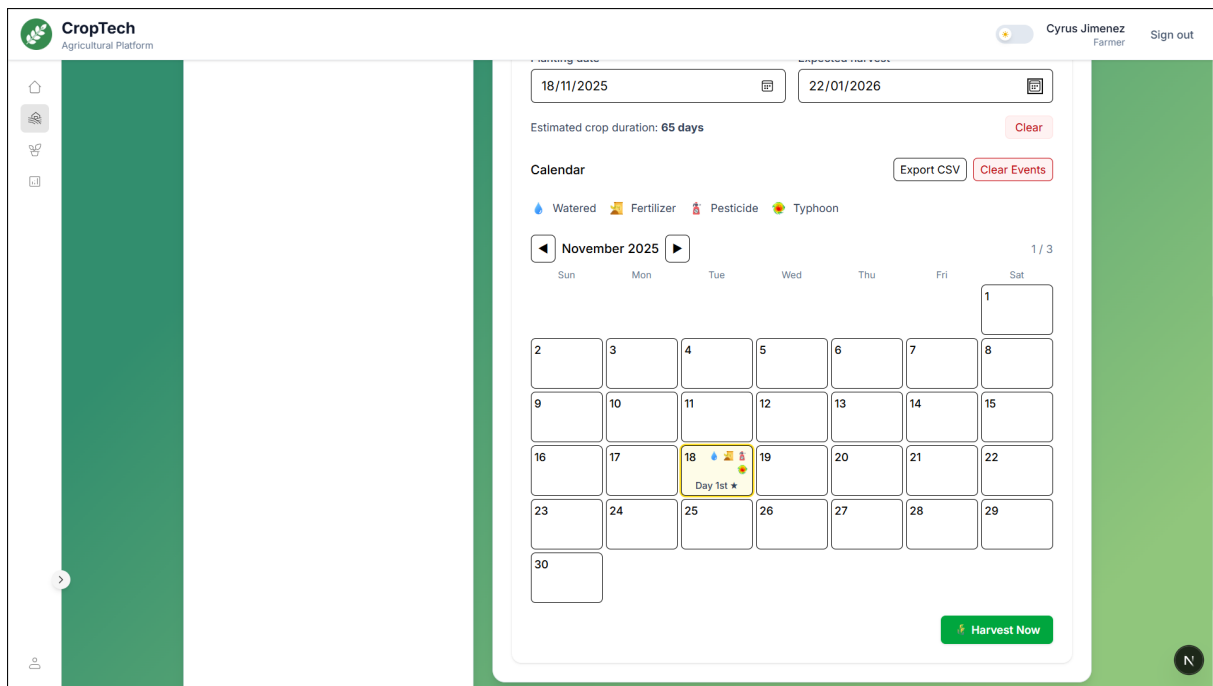

Figure 18: Button displayed on the expected harvest date.

7.5.1 Recording Harvest

1. Click the Harvest button. 2. Enter the **Actual Harvest Date**. 3. Enter the **Actual Yield (kg)**. *Note: The "Record Harvest" button is disabled until the yield is entered.* 4. Add any notes and click **Record Harvest**.

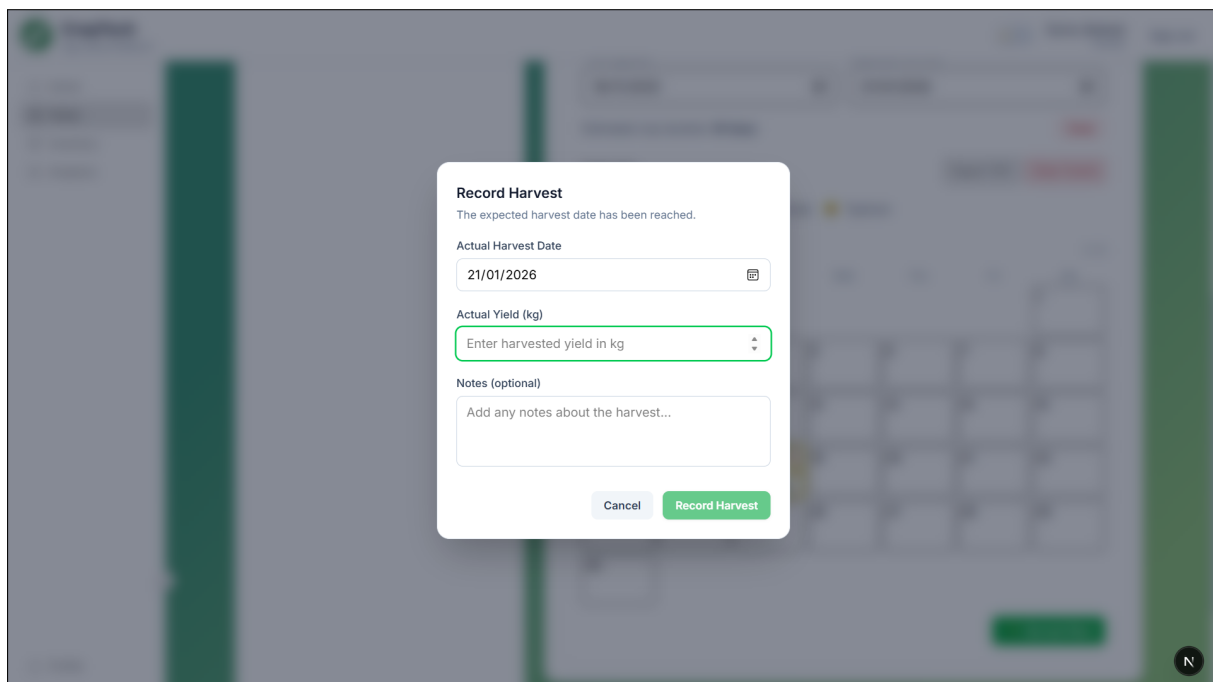

Figure 19: Pop-up before filling details (Button disabled).

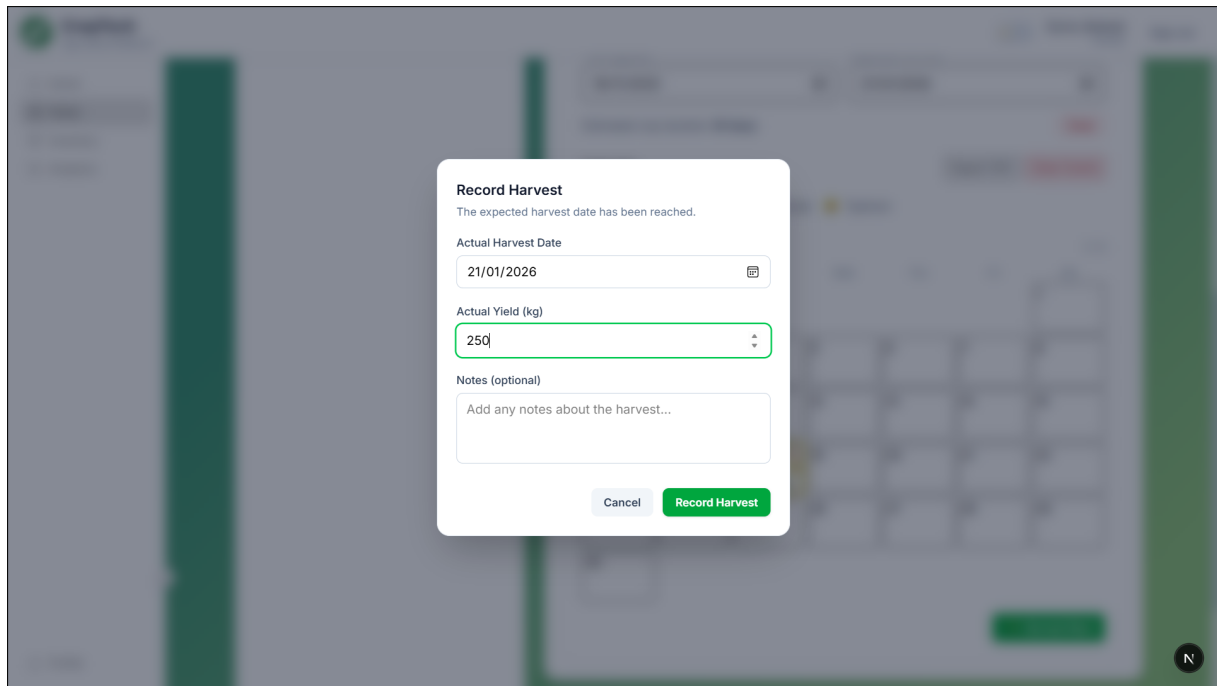

Figure 20: Pop-up with details filled (Button enabled).

7.6 Harvest History

Scroll to the bottom of the field page to view the history of all recorded harvests.

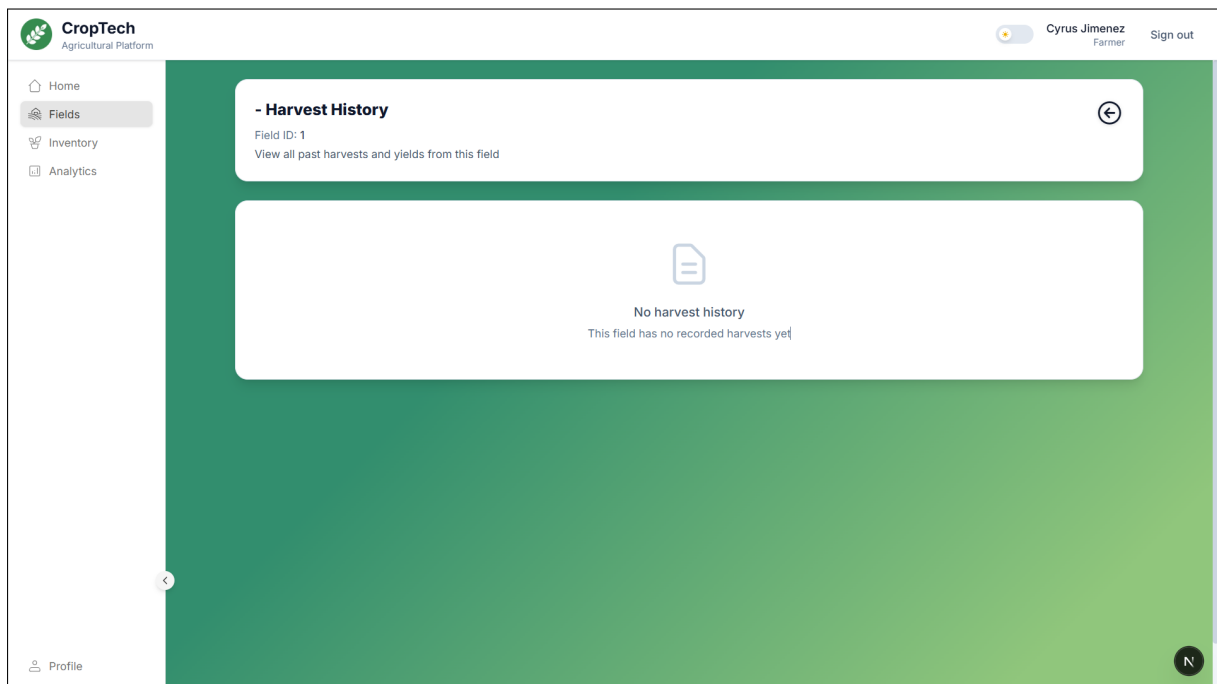

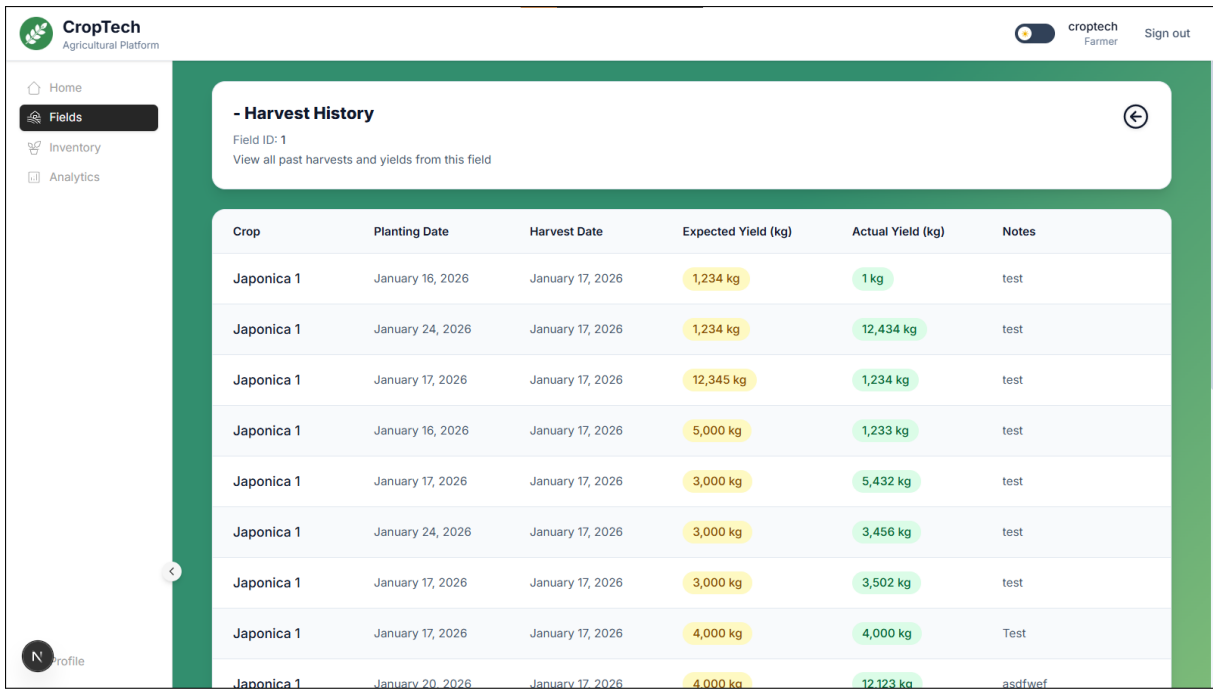

Figure 21: Harvest history table with no records.

The screenshot displays the CropTech Agricultural Platform interface. On the left is a sidebar with navigation links: Home, Fields (selected), Inventory, and Analytics. The top right shows a toggle for 'croptech Farmer' and a 'Sign out' button. The main content area is titled '- Harvest History' with a sub-header 'Field ID: 1' and a description 'View all past harvests and yields from this field'. Below this is a table with the following columns: Crop, Planting Date, Harvest Date, Expected Yield (kg), Actual Yield (kg), and Notes. The table contains 10 rows of harvest data for 'Japonica 1'.

Crop	Planting Date	Harvest Date	Expected Yield (kg)	Actual Yield (kg)	Notes
Japonica 1	January 16, 2026	January 17, 2026	1,234 kg	1 kg	test
Japonica 1	January 24, 2026	January 17, 2026	1,234 kg	12,434 kg	test
Japonica 1	January 17, 2026	January 17, 2026	12,345 kg	1,234 kg	test
Japonica 1	January 16, 2026	January 17, 2026	5,000 kg	1,233 kg	test
Japonica 1	January 17, 2026	January 17, 2026	3,000 kg	5,432 kg	test
Japonica 1	January 24, 2026	January 17, 2026	3,000 kg	3,456 kg	test
Japonica 1	January 17, 2026	January 17, 2026	3,000 kg	3,502 kg	test
Japonica 1	January 17, 2026	January 17, 2026	4,000 kg	4,000 kg	Test
Japonica 1	January 20, 2026	January 17, 2026	4,000 kg	12,123 kg	asdfwef

Figure 22: Table columns: Crop name, Planting date, Harvest date, Yields, Notes.

8 Inventory Module

8.1 Rice Varieties

Go to the **Rice Varieties** tab to view your stock.

- View list of varieties (Name, Unit, Price, Condition).
- Buttons to Clear Inventory or Clear All Data are available.

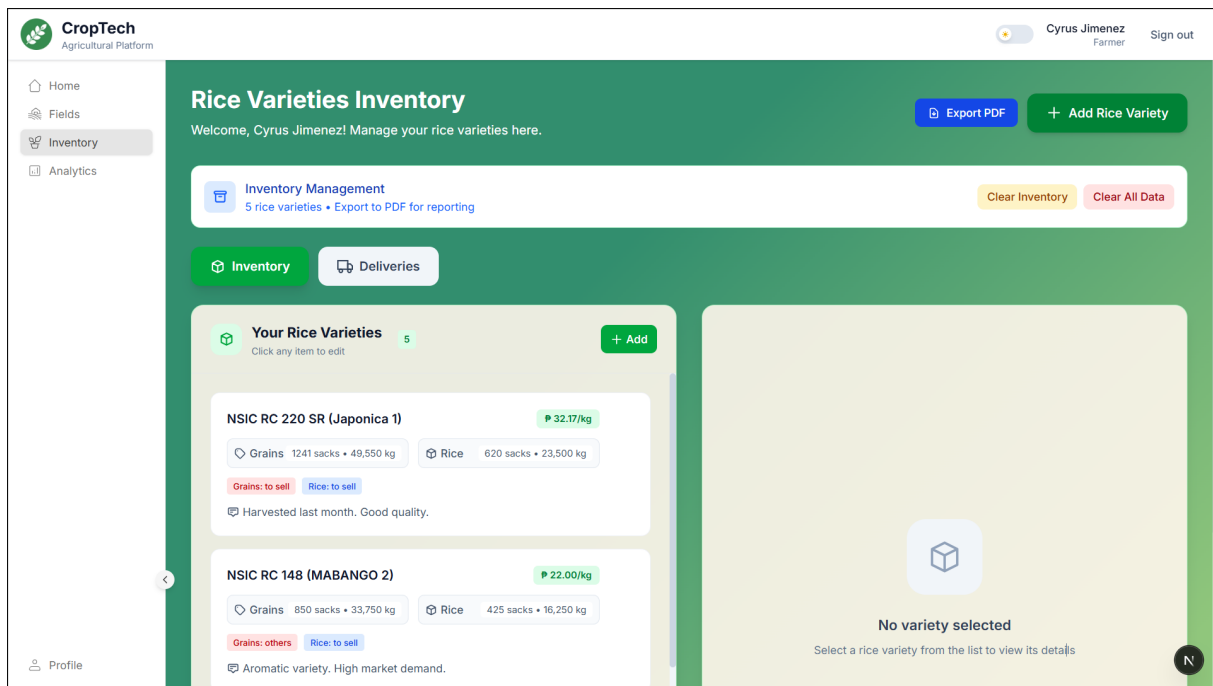

Figure 23: Inventory tab showing list of rice varieties.

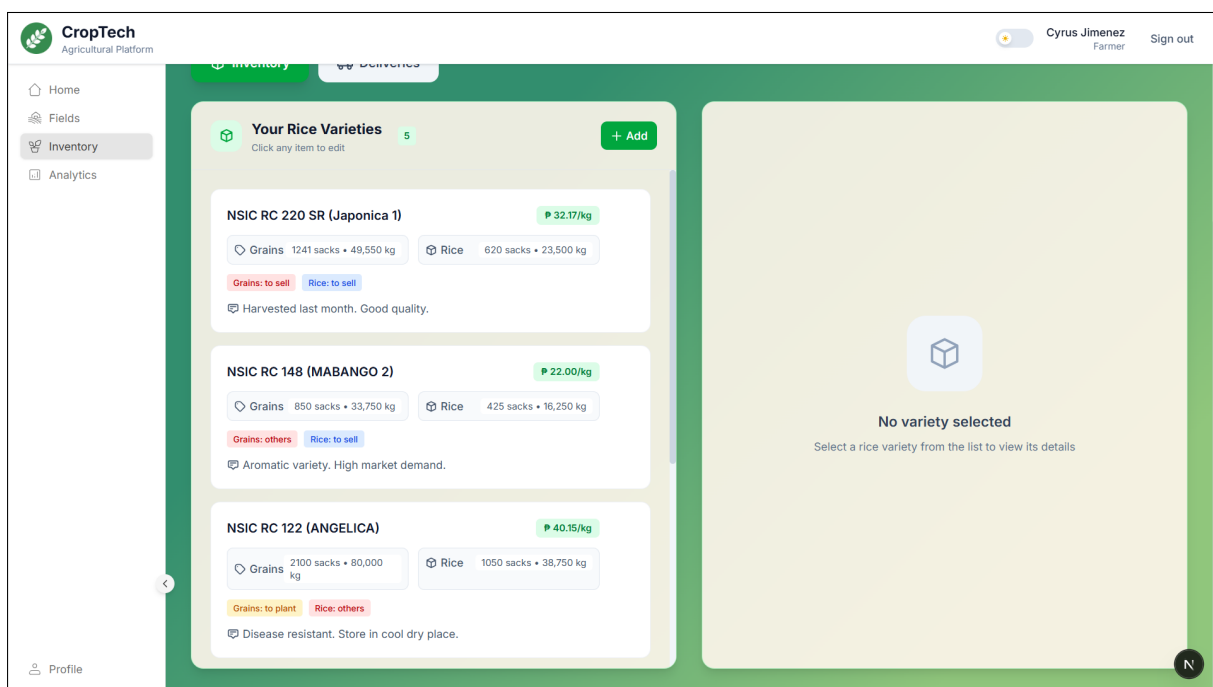

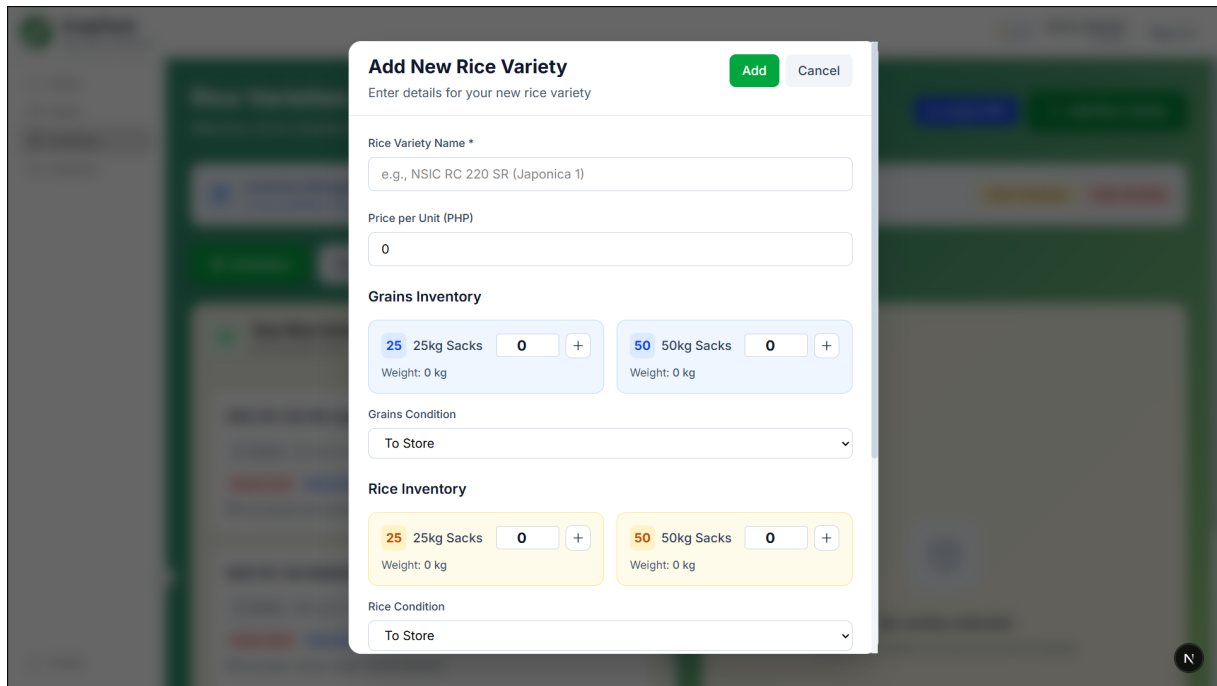

Figure 24: Detail columns: Name, Unit, Price, Condition, Remarks.

8.1.1 Adding Rice Variety

1. Click **Add**. 2. Enter **Name** and **Price per Unit**.

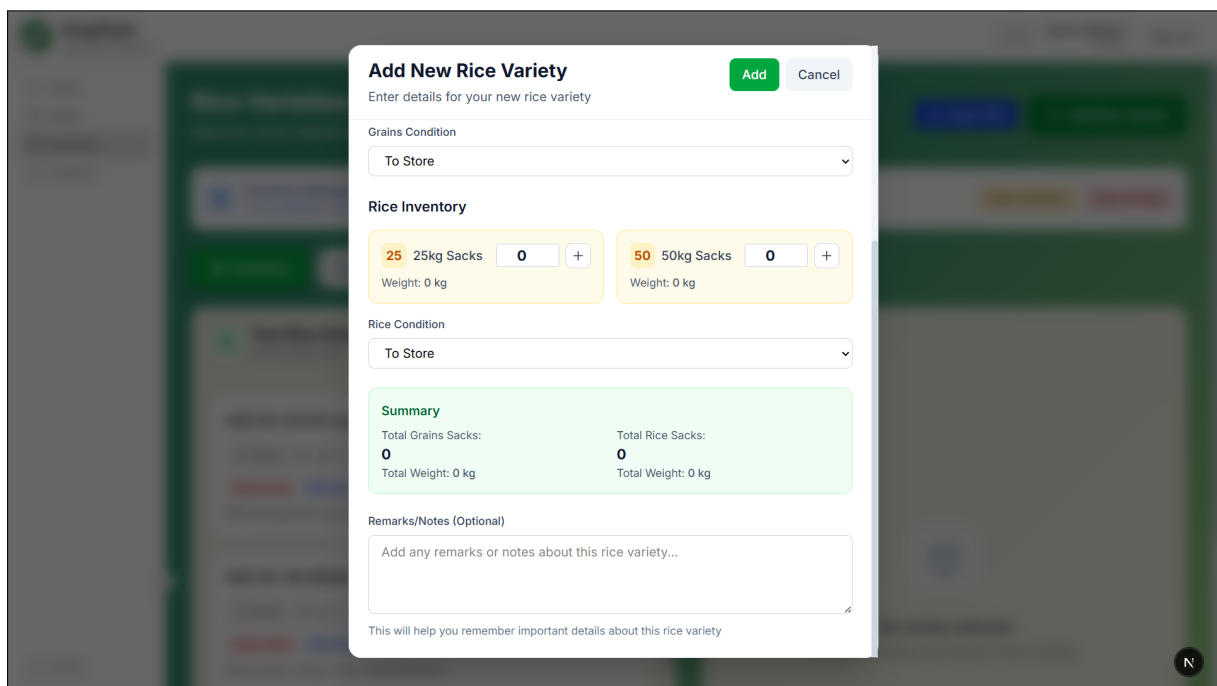

The screenshot shows a modal form titled "Add New Rice Variety" with a subtitle "Enter details for your new rice variety". At the top right are "Add" and "Cancel" buttons. The form contains the following fields:

- Rice Variety Name ***: A text input field with a placeholder "e.g., NSIC RC 220 SR (Japonica 1)".
- Price per Unit (PHP)**: A text input field with the value "0".
- Grains Inventory**: A section with two input groups. The first group is for "25 25kg Sacks" with a count of "0" and a "Weight: 0 kg" label. The second group is for "50 50kg Sacks" with a count of "0" and a "Weight: 0 kg" label.
- Grains Condition**: A dropdown menu with "To Store" selected.
- Rice Inventory**: A section with two input groups. The first group is for "25 25kg Sacks" with a count of "0" and a "Weight: 0 kg" label. The second group is for "50 50kg Sacks" with a count of "0" and a "Weight: 0 kg" label.
- Rice Condition**: A dropdown menu with "To Store" selected.

Figure 25: Inputs for Name and Price per Unit.

3. Input inventory count for **25kg** and **50kg** sacks. 4. Select **Condition** (To Store, To Plant, To Dispose).

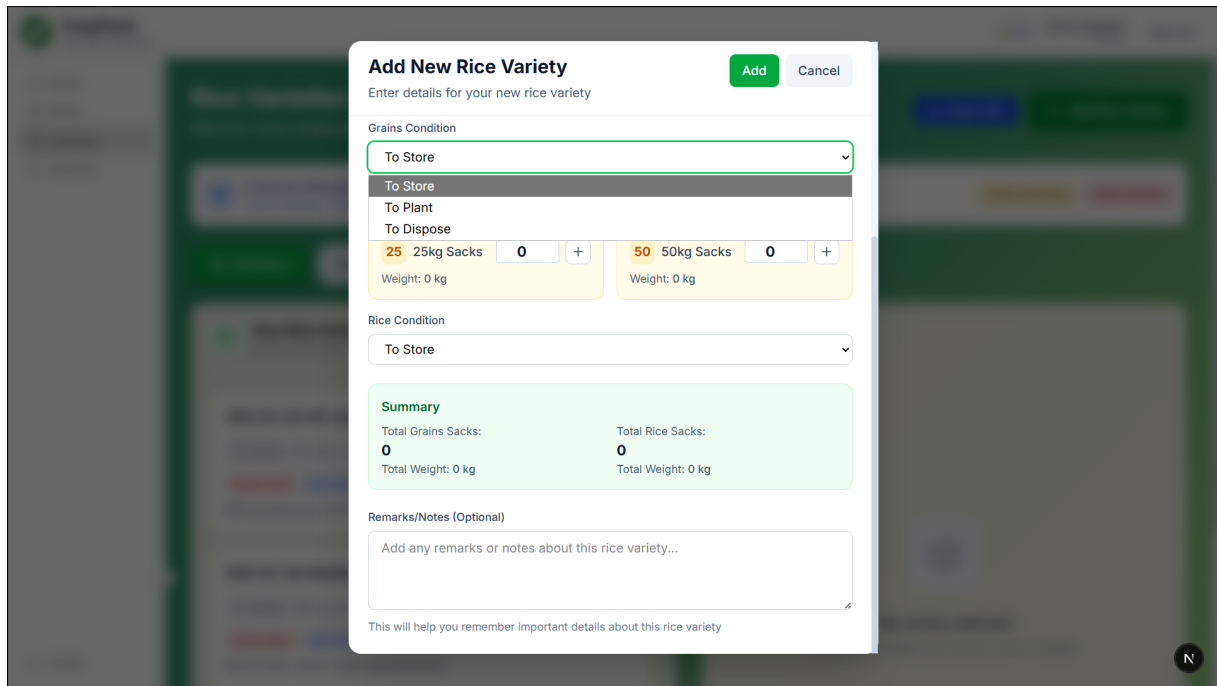

The screenshot shows the same "Add New Rice Variety" form, but with additional fields visible below the inventory sections:

- Summary**: A green-bordered box containing two columns of totals. The left column shows "Total Grains Sacks: 0" and "Total Weight: 0 kg". The right column shows "Total Rice Sacks: 0" and "Total Weight: 0 kg".
- Remarks/Notes (Optional)**: A text area with a placeholder "Add any remarks or notes about this rice variety...".
- A footer note: "This will help you remember important details about this rice variety".

Figure 26: Inputs for Sacks and Condition Dropdown.

5. Review the summary of total weights and add remarks. 6. Click **Save**.

10 User Profile Module

10.1 Accounts Tab

Edit your Full Name, Email, Role, or change your password.

The screenshot shows the 'Profile & Settings' page in the CropTech Agricultural Platform. The page is titled 'Profile & Settings' with a subtitle 'Manage your account, preferences, and app settings.' The left sidebar is identical to the dashboard view. The main content area is divided into two sections: 'Account Information' and 'Change Password'.

Account Information: This section allows users to update their personal information and password. It includes input fields for 'Full name' (Cyrus Jimenez), 'Email' (cyrusjimenez60@gmail.com), and 'Role' (Farmer).

Change Password: This section provides input fields for 'Current password', 'New password', and 'Confirm new password'. Below these fields are 'Save Changes' and 'Reset' buttons.

Figure 47: Edit inputs for personal info and password.

10.2 App Settings Tab

Select your preferred unit system (Metric or Imperial).

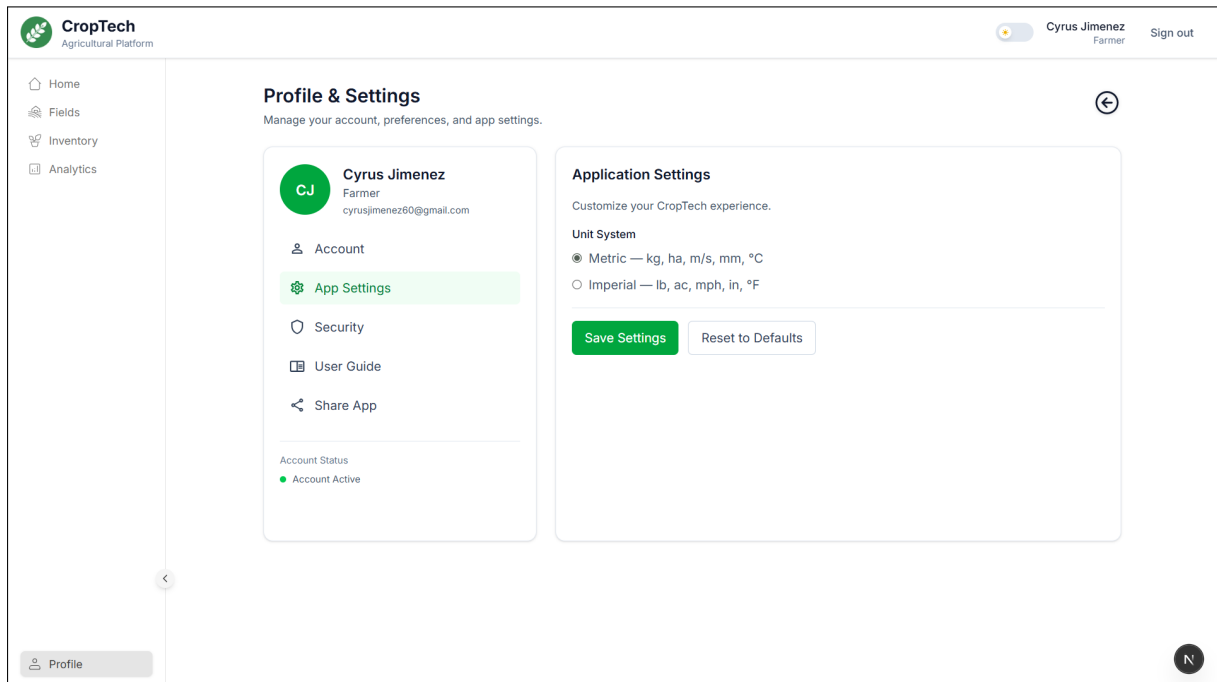

Figure 48: Unit system selection (Metric vs Imperial).

10.3 Security Tab

Configure Session Timeout (15m to Never) and toggle Save Login.

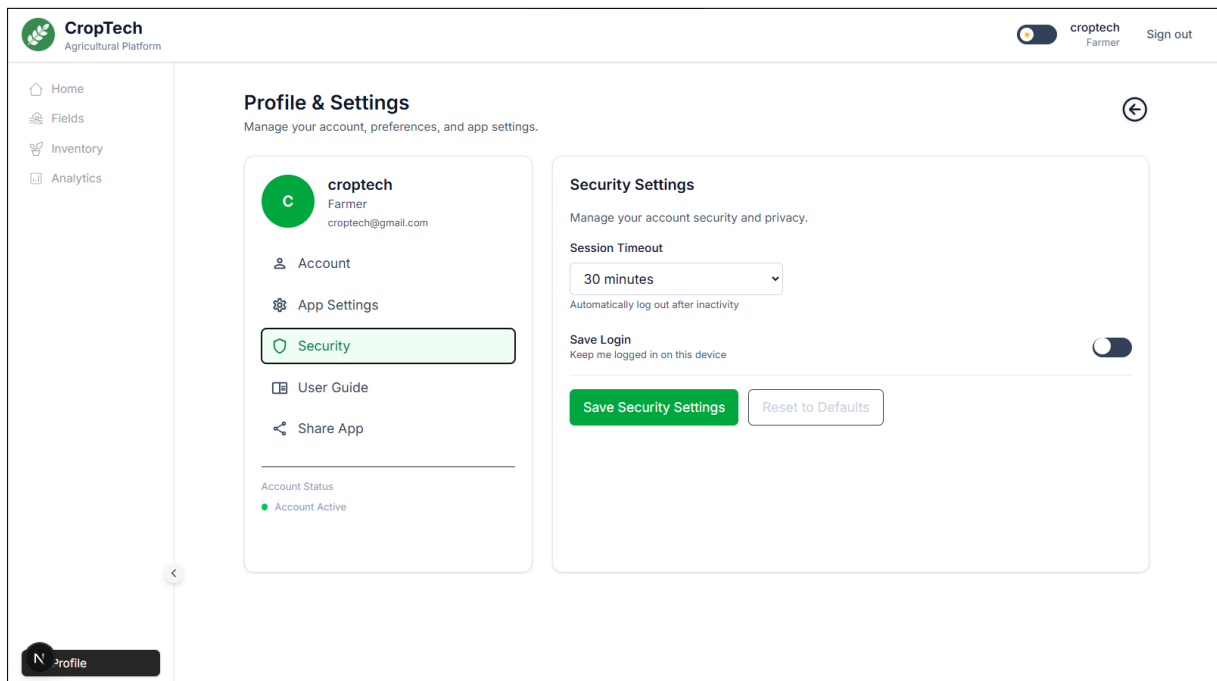

Figure 49: Session timeout dropdown and Save Login toggle.

10.4 User Guide Tab

View summary or download the PDF manual.

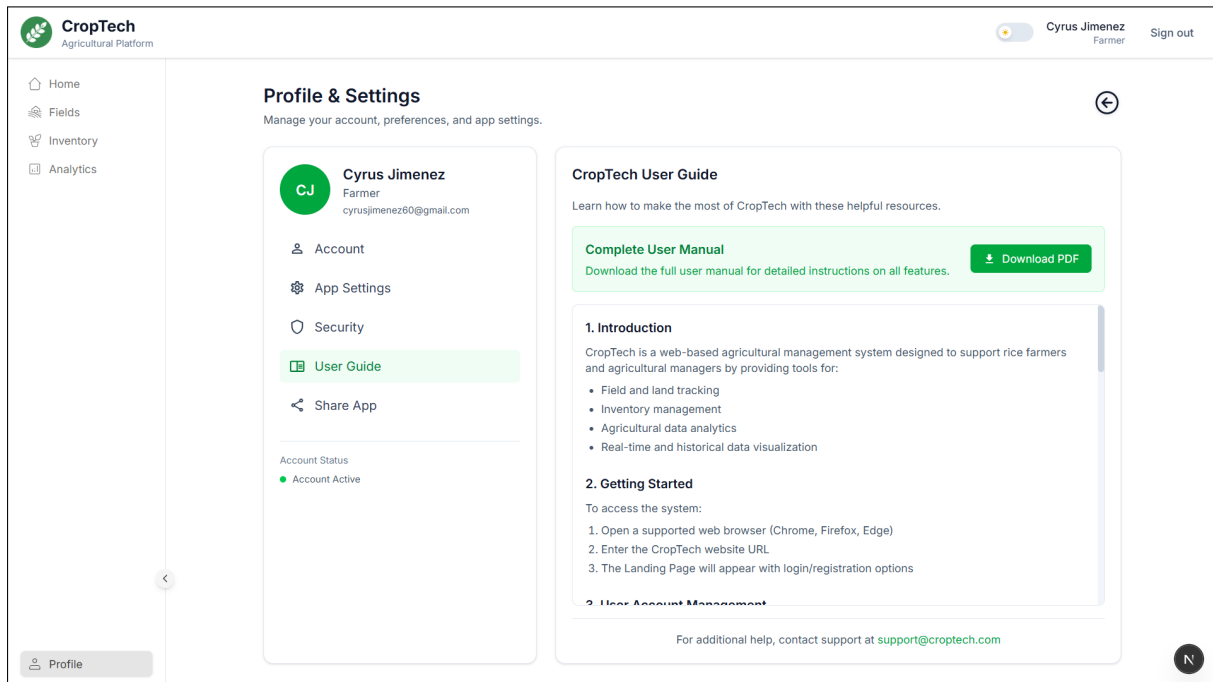

Figure 50: Summary view and Download Manual button.

10.5 Share App Tab

Copy link or share to social media (Facebook/Twitter).

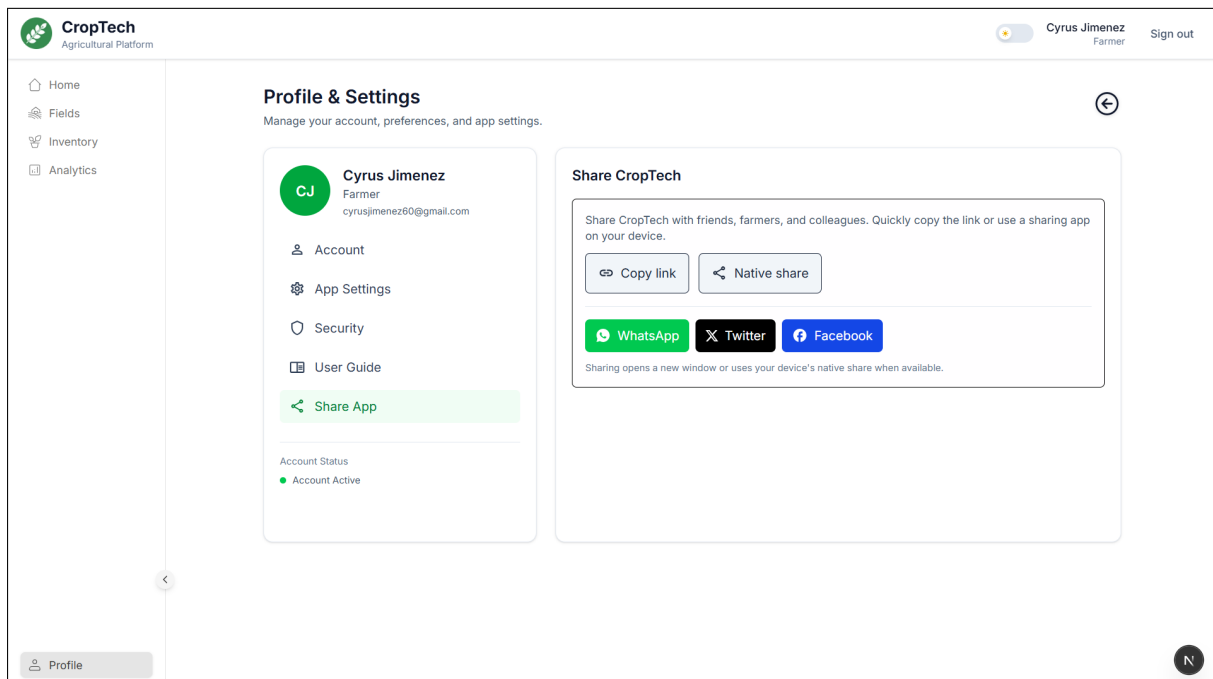

Figure 51: Copy link button and social media icons.

11 Error Handling and Messages

The system provides clear messages in the following cases:

Common Error Scenarios

- **Invalid login credentials:** Ensure email and password are correct.
- **Missing or incorrect input fields:** Fill in all required fields marked with an asterisk.
- **Failed data loading:** Check your internet connection if charts or maps fail to load.

Users are guided with on-screen prompts to resolve errors.

12 Security Features

- Secure login and authentication
- Protected user sessions
- Backend validation for all data operations

13 End of User Session

Security Tip: Users are encouraged to log out after using the system, especially when accessing the platform from shared devices.
