1 Introduction

1.1 Purpose of the Manual

This User Instruction Manual provides step-by-step guidance on how to use the **CropTech Agricultural Management Platform**. It is intended to help users understand the system's features, navigate the interface, and properly perform common tasks.

The manual follows international standards for user documentation to ensure clarity, consistency, and ease of use for both technical and non-technical users.

1.2 System Overview

CropTech is a web-based agricultural management system designed to support rice farmers and agricultural managers by providing tools for:

- Field and land tracking
- Inventory management
- Agricultural data analytics
- Real-time and historical data visualization

The system integrates mapping services, weather data, and backend data processing to support data-driven agricultural decision-making.

2 Intended Users

This system is designed for the following user groups:

- Rice farmers
- Farm managers
- Agricultural staff
- System administrators

Note: Users are expected to have basic knowledge of using a web browser but do not need technical or programming skills.

3 System Requirements

3.1 Hardware Requirements

- Desktop or laptop computer
- Minimum screen resolution: 1280 × 720
- Stable internet connection

3.2 Software Requirements

- Web browser (Google Chrome, Mozilla Firefox, Microsoft Edge)
- Internet access for real-time data features such as weather updates and maps

4 Getting Started

4.1 Accessing the System

1. Open a supported web browser.
2. Enter the CropTech website URL in the address bar.
3. The Landing Page will appear, displaying options to log in or create an account.

5 User Account Management

5.1 Creating a New Account

1. From the Landing Page, click **Create Account**.
2. Enter the required information:
 - Full Name
 - Email Address
 - Password
3. Click **Sign Up**.
4. A verification email will be sent to the registered email address.
5. Click the verification link to activate the account.

5.2 Logging In

1. Click **Log In** on the Landing Page.
2. Enter the registered email address and password.
3. Click **Log In**.
4. Upon successful authentication, the system redirects the user to the Dashboard.

5.3 Logging Out

1. Click **Logout** from the navigation menu.
2. The system securely ends the user session.

6 System Navigation

After logging in, users can navigate the system using the main navigation menu. The menu provides access to the following modules:

- Dashboard
- Land Tracker
- Inventory
- Analytics

- User Profile
- Logout

The navigation menu remains consistent across all system pages to ensure ease of use.

7 Dashboard

The Dashboard serves as the main overview page after login. It provides quick access to system modules and displays summarized information relevant to the user.

8 Land Tracker Module

8.1 Purpose

The Land Tracker module allows users to manage and monitor agricultural fields using an interactive map interface.

8.2 Viewing Fields

1. Click **Land Tracker** from the navigation menu.
2. The system displays a map showing all registered fields.
3. Users can select a field to view its location and boundaries.

8.3 Field Details

When a field is selected, the system displays:

- Field location on the map
- Field size
- Associated crop information
- Related field data retrieved from the backend

The map interface supports interactive viewing for better geographic understanding.

9 Inventory Module

9.1 Purpose

The Inventory module allows users to manage farm resources such as tools, materials, and supplies.

9.2 Adding an Inventory Item

1. Navigate to **Inventory**.
2. Click **Add Item**.
3. Enter the required information:

- Item name
 - Quantity
 - Category
4. Click **Save**.
 5. The item is stored in the system database and displayed in the inventory list.

9.3 Updating Inventory Items

1. Select an existing inventory item.
2. Click **Edit**.
3. Modify the necessary details.
4. Click **Save** to apply changes.

9.4 Deleting Inventory Items

1. Select an inventory item.
2. Click **Delete**.
3. Confirm the deletion when prompted.

10 Analytics Module

10.1 Purpose

The Analytics module provides visual insights using real-time and historical agricultural data.

10.2 Viewing Analytics Data

1. Navigate to **Analytics**.
2. Select the desired data category or metric.
3. The system displays charts and graphs representing:
 - Crop performance
 - Weather-related data
 - Field-related analytics

Charts automatically update as new data becomes available.

11 User Profile Module

11.1 Managing Profile Information

1. Navigate to **User Profile**.
2. View or update personal account information.

3. Save changes to update profile details.

The system ensures secure handling of user data.

12 Error Handling and Messages

The system provides clear messages in the following cases:

Common Error Scenarios

- **Invalid login credentials:** Ensure email and password are correct.
- **Missing or incorrect input fields:** Fill in all required fields marked with an asterisk.
- **Failed data loading:** Check your internet connection if charts or maps fail to load.

Users are guided with on-screen prompts to resolve errors.

13 Security Features

- Secure login and authentication
- Email verification during account creation
- Protected user sessions
- Backend validation for all data operations

14 End of User Session

Security Tip: Users are encouraged to log out after using the system, especially when accessing the platform from shared devices.
